

Challenge

Outsourcing in the Telecoms sector has provided specialists to various companies during critical phases of growth.

The level of growth that we are currently witnessing in this sector means it is not possible for the majority of organisations to have the entire skill-sets internally to achieve successful business solutions delivery.

For that reason, outsourcing can provide a very cost effective way forward. In tough economic conditions it makes sense to engage with the best quality professionals at a affordable cost.

Rise to the Challenge

Making the decision to outsource your temporary/contract Telecommunications requirements while ensuring minimum impact on your day to day business.

How we Assist

PLC can perform consultation, develop and realise cost effective HR solutions. We offer a total analysis of your resourcing needs.

Our sophisticated screening processes will ensure that we deliver the most suitable consultants across the technological spectrum.

We provide consultants and permanent staffing and have developed our International consultant database to approx 42,000 CV's.

Combining over 20 years of in-house consultancy experience we are confident that we can supply you with the correct know-how for every phase of your project from Planning and Conception, through to Implementation and Roll-out.
